Dear Hiring Manager at Priority Technology Holdings, Inc,

I'm writing to express my strong interest in the Software Engineer position at Priority Technology Holdings, Inc. My combined background in computer science education at Virginia Tech and hands-on cloud engineering experience makes me a qualified candidate for your dynamic team.

In my current role as a Founding Engineer/Full Stack Developer Intern at HashedTokens, I gained valuable experience leading the development of an OTP SaaS platform. This project honed my proficiency in AWS, Node.js, and React, further validated by my AWS Certified Developer - Associate certification.

Beyond this project, internships at Systems Definition Inc. and Triangle Works Corporation broadened my skillset in React, TypeScript, Java, and AWS. I'm confident in delivering high-quality code independently and collaborating effectively within cross-functional teams.

I'm particularly excited about contributing to a Fintech product platform, leveraging my existing skills in Node.js, React.js, and ASP.NET/C#. My continuous learning commitment, evident in my certifications and personal projects, ensures I stay updated with the latest technologies.

Thank you for considering my application. I eagerly await the opportunity to discuss how my skills and enthusiasm can benefit your team.

Sincerely,

Andrew Sunwoo
